

SPPL-156: Apply Filter to Table - All and Getsudo Tabs

Jira Ticket: [SPPL-156: BE | Implement Filters for Table API with UT based on the technical workflow](#) **IN PROGRESS**

i *How does the filter function on each tab - All & Getsudo to retrieve the filtered scenarios?*

UI Component:

GPS Vanning Rundowns

Create January 2026 Getsudo Rundown

+ Custom New Scenario Edit Default Configuration

Vanning Rundown Summary

As of Apr 4, 11:11 AM CDT • 1,234 Items • View by • Sorted by

Table Filtered by: (no in-line filters applied)

Scenario	Plan	NAMC/Line	Cycle	Created By	Last Updated	Status	Action
Getsudo/TMMK/Line1_J...	Getsudo	TMMK/Line1	Jan26	Schneider, Axl	12/10/2025	Completed	
Getsudo/TMMI/East_JuL...	Getsudo	TMMI/East	Jan26	Nagarajan, Selva	01/15/2026	Completed	Open
Getsudo/TMMC/North_J...	Getsudo	TMMC/North	Dec25	Mawande, Ankit	12/22/2025	In progress	Delete
Getsudo/TMMK/Line1_Ju...	Getsudo	TMMK/Line1	Nov25	Diago, Daniel	11/24/2025	Completed	
Getsudo/TMMC/North_J...	Getsudo	TMMC/North	Oct25	Doe, John	10/21/2025	Completed	

1. **Hosted URL:** <https://api.spln.cube<env>.toyota.com/<env>>

2. **API Name:** <HOSTED_URL>/v/1/1/sp/scenarios/{type}

3. **Path Param:** {type} **could be all or getsudo**

4. **Query Param:** ?page=1

&limit=40

&month=**all**,Jan,Feb,Mar,Apr,May,Jun,Jul,Aug,Sep,Oct,Nov,Dec **//If**

this key exist then it should have some value. No empty string or only space in string is allowed.

&createdBy=**all**,loggedInUserEmail **//If this key exist then it should have some value. No empty string or only space in string is allowed.**

&namc=**all**,TMMI,TMMC,MTM **//If this key exist then it should have some value. No empty string or only space in string is allowed.**

&status=**all**,Not Started,In Progress,Completed **//If this key exist then it should have some value. No empty string or only space in string is allowed.**

5. **Method:** GET

6. **Authorization:** Bearer token (**required**)

7. **Lambda Name:** spln-<env>-scenarios-table-v1-1

8. API Request Body: N/A

9. API Response:

- **Success response with status 200 :**

```
1  {

3 }
```

- **List of possible validation error message:**

- "ValidationError: month must be a list, and each item must be a string." **//If this key exist then it should have some value. No empty string or only space in string is allowed.**
- "ValidationError: createdBy be a string." **//If this key exist then it should have some value. No empty string or only space in string is allowed.**
- "ValidationError: namc must be a list, and each item must be a string." **//If this key exist then it should have some value. No empty string or only space in string is allowed.**
- "ValidationError: status must be a list, and each item must be a string." **//If this key exist then it should have some value. No empty string or only space in string is allowed.**

10. Update in Query required:

a. Get scenarios data based on filter

- For ALL and Getsudo tabs

```
1  --if specific options are selected from the filters from the UI
2  select * from supply_planning.scenarios
3    where is_active = true
4    AND namc in (<namc filter>)
5    AND user_email in (<createdBy filter>)
6    AND scenario_cycle SIMILAR TO (<month filter>) -- '(Jan/Feb/Mar)%'
7    AND status in (<scenario-status filter>)
8    order by created_date_timestamp
9    desc limit :perPageRow
10   offset :startAt;
11  --if all options are selected from the filter from the UI
12  select * from supply_planning.scenarios
13    where is_active = true
14    order by created_date_timestamp
15    desc limit :perPageRow
16    offset :startAt;
```

b. Get scenarios data count for pagination based on filter

i. For ALL and Getsudo tabs

```
1  --if options specific are selected from the filters from the UI
2  select count(*) from supply_planning.scenarios
3    where is_active = true
4    AND namc in (<namc filter>)
5    AND user_email in (<createdBy filter>)
6    AND scenario_cycle SIMILAR TO (<month filter>) -- '(Jan/Feb/Mar)%'
7    AND status in (<scenario-status filter>);
8  --if options all are selected from the filter from the UI
9  select count(*) from supply_planning.scenarios
10   where is_active = true;
```

11. Below keys are optional in the query param for filter functionality, Skip the validation if the following filters key are not available in the query parameters.

- a. month
- b. createdBy
- c. namc
- d. status

12. Note:

a. We will expect **all** as query param value for below key if all options are selected from the filter from the UI:

- i. month
- ii. createdBy
- iii. namc
- iv. status

Note:

1. The count of scenarios for each table will be based on filters if applied.
2. If all options are selected from the filter from the UI, then **all** as query param value will be provided.
3. API will send **all** as filter options selected as response if all options are selected from the filter from the UI.
 - a. *for example: if status filter have only "Not Started" option selected then in response status filter will have "Not Started" option and if status filter have all selected option-all("Not Started", "In Progress", "Completed") then in response status filter will have **all** instead of "Not Started", "In Progress" and "Completed".*
4. By default filters option will be empty in response if no filter is applied from the UI.
